How to build a Box Oven

1. Get a strong photo copy box with the lid.
2. Lay Heavy Duty foil long way in the box while overlapping to the outside of the box a few inches on each side.
3. Now lay the foil going the other way. Doing it in this order offers the most continuous coverage of foil.
4. Trim the foil all the way around the box and cover all four sides with one strip of duck tape.
5. Gather 4 green bean cans the same size / 4 rocks / 1 cookie sheet from the dollar tree / 1 sheet of foil as seen.
6. Rest the box over the cans & cookie sheet so each of the four corners are on a rock. This gives air to the hot coals.

Once you are done using it you can put everything inside the box, cover it, and go. There is also enough room to put your ingredients and charcoal when you travel.
